**DETAILED ACTION**

***Response to Amendment***

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 33, drawn to a method for controlling an engine, classified in class 123, subclass 494.
  - II. Claims 16-32, drawn to a measuring device for a vehicle, classified in class 73, subclass 118.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the method claims of Group I are directed toward generating information and carrying out a function to control the engine, while the system claims are directed to a vehicle having a fuel tank.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Anna McCoy on April 29, 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-15 and 33. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16-32 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kirwan et al (6,178,949).

Kirwan et al teach a method for controlling an engine comprising the steps of providing a signal related to volatility of the fuel and adjusting the fuel timing (see col. 4 lines 38-61).

6. Claims 7-15, 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Shindoh et al (6,102,000).

Shindoh et al teach a method for controlling an engine comprising the steps of adjusting the fuel in relation to the fuel viscosity (see col. 13 line 4 through col. 15 line 11).

7. Claims 7-15, 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Moronuki (JP-158768).

Moronuki teaches a method for controlling an engine comprising the steps of adjusting the fuel in relation to the fuel viscosity.

***Allowable Subject Matter***

8. Claims 1-4 are allowed.

***Response to Arguments***

9. Applicant's arguments with respect to claims 1-15, 33 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
